PROFESSIONAL SUMMARY

Resourceful Building Technology Education graduate and Health, Safety & Environment (HSE) professional with practical experience in industrial safety operations, hazard identification, and regulatory compliance within operational environments. Currently working as an HSE Officer supporting safe work practices at the Lagos Deep Offshore Logistics Base (LADOL).

Possesses strong knowledge of construction principles, sustainable building practices, and renewable energy applications, combined with practical experience in risk assessment, site safety inspections, and safety training.

Also experienced in digital technologies, web development, and AI productivity tools, with a track record of developing digital platforms, automation solutions, and technology-based business initiatives. Demonstrates the ability to combine technical knowledge, safety compliance, and digital innovation to support modern workplace efficiency and sustainable development.

CORE COMPETENCIES

Health, Safety & Environment

- HSE Compliance & Regulatory Awareness
- Hazard Identification & Risk Assessment
- Site Safety Inspection & Monitoring
- Toolbox Talks & Safety Induction Training
- Incident Reporting & Investigation

Construction & Technical Knowledge

- Building Technology & Construction Principles
- Construction Materials & Structural Concepts
- Sustainable Building Practices
- Renewable Energy Awareness

Business & Operational Skills

- Procurement & Technical Sales
- Negotiation & Pricing Strategy
- Customer Relationship Management
- Operations Coordination & Record Keeping

Digital & Technology Skills

- AI Productivity Tools & Digital Workflow Systems
- Basic Web Development & Website Management
- GitHub Version Control & Website Deployment
- Python Automation (Basic)
- Technical Troubleshooting & Computer Support

WORK EXPERIENCE

Health, Safety & Environment (HSE) Officer

Amborg Global Resources Limited

(Client: LADOL – Lagos Deep Offshore Logistics Base)
Lagos, Nigeria
May 2025 – Present

- Conduct daily site safety inspections to ensure compliance with company and regulatory HSE standards.
- Identify workplace hazards and carry out risk assessments to reduce operational risks.
- Deliver toolbox talks, safety briefings, and safety induction training for workers and contractors.
- Monitor site operations to ensure adherence to safe work procedures.

- Report unsafe conditions, incidents, and near misses while supporting incident investigation processes.
- Maintain HSE documentation, safety records, and compliance reports.
- Work closely with engineers, supervisors, and operational personnel to strengthen site safety culture.

Key Contribution

Promoted increased safety awareness among site personnel through consistent hazard identification and safety communication.

Technology & Digital Solutions Developer

Freelance / Independent Projects

Nigeria
2023 – Present

- Design and develop responsive websites for individuals and organizations.
- Built and deployed a **professional portfolio website** showcasing personal skills, projects, and services.
- Developed and managed a digital technology marketplace platform (**BMS TECH**) focused on the sale of mobile phones and laptops.
- Utilize AI productivity tools to improve workflow efficiency, content generation, and digital operations.
- Develop automation scripts and digital tools for operational efficiency and productivity improvement.
- Manage project repositories, version control, and deployment using GitHub.
- Provide technical support services including system troubleshooting and digital setup.

Procurement & Technical Sales Specialist

Self-Employed

Nigeria
2019 – Present

- Manage procurement and sales of technology devices, real estate opportunities, and related services.
- Identify market demand and strategically source products and services to meet client needs.
- Negotiate pricing and service agreements with suppliers and clients.

- Maintain long-term customer relationships through effective communication and service delivery.
- Provide technical guidance to customers on product usage and available service options.
- Maintain accurate records for procurement, sales transactions, and financial operations.

PROJECTS

Solar Panel System Design Project

Designed and implemented a solar panel system as part of an academic project focused on renewable energy integration within buildings.

Final Year Research Project

Skill Improvement Needs among Building Technology Education Students in Ilorin Universities

Conducted academic research identifying technical skill gaps among building technology students and recommending strategies to improve industry readiness.

Professional Portfolio Website

Designed and deployed a personal portfolio website to showcase professional background, projects, and contact functionality.

BMS TECH Digital Marketplace (In Development)

Developing an online technology marketplace focused on the sale of mobile phones and laptops.

TECHNICAL SKILLS

- Health, Safety & Environment (HSE) Operations
- Hazard Identification & Risk Assessment
- Site Safety Monitoring & Compliance
- Construction Methods & Building Technology Principles
- Solar Energy System Basics
- Technical Documentation & Reporting
- Research & Technical Analysis
- Microsoft Word (Professional Documentation)

TECHNOLOGY & DIGITAL SKILLS

- AI Productivity Tools
- Basic Web Development
- GitHub Version Control
- Website Deployment (GitHub Pages)
- Python Automation (Basic)
- Technical Troubleshooting

TRAINING & PROFESSIONAL DEVELOPMENT

Health, Safety & Environment Practical Training

- Hazard Identification
- Risk Assessment
- Toolbox Talks
- Incident Reporting
- Workplace Safety Implementation

HSE Professional Certification (Level 1–3) — In Progress.

PROFESSIONAL STRENGTHS

- Strong commitment to workplace safety and regulatory compliance
- Ability to combine technical knowledge with practical field operations
- Adaptable to both engineering and digital work environments
- Continuous learner with interest in emerging technologies and safety systems
-

EDUCATION

B.Sc.Ed – Building Technology Education

University of Ilorin,
Kwara State, Nigeria.
2024
