## PROFESSIONAL PROFILE

Versatile Building Technologist with a background in Building Technology Education and hands-on experience in sustainable building practices, energy efficiency, and construction principles. Demonstrated practical knowledge through academic projects, including the design and implementation of a solar panel system, and research focused on improving technical skills in building technology students. Possesses strong research ability and problem-solving skills, enabling effective analysis of building performance, construction methods, and occupant-focused design challenges. Experience working in Health, Safety, and Environment (HSE) has strengthened practical understanding of site safety, risk assessment, and compliance. Passionate about contributing to safer, smarter, and more sustainable development within Nigeria's built environment through technical competence, continuous learning, and data-informed decision-making.

---

## CORE COMPETENCIES

- Health, Safety & Environment (HSE) Compliance
- Construction & Building Technology Knowledge
- Sustainable Building & Renewable Energy Awareness
- Research, Technical Analysis & Reporting
- Technical Sales, Procurement & Service Delivery
- Negotiation & Pricing Strategy
- Business Operations Management
- Customer Relationship Management
- Problem Solving & Critical Thinking
- Ability to Work Effectively Under Pressure
- Communication & Team Collaboration
- Record Keeping & Documentation

---

# WORK EXPERIENCE

## **Health, Safety & Environment (HSE) Officer**

Amborg Global Resources Limited (Client: LADOL – Lagos Deep Offshore Logistics Base)

May 2025 – Till Date | Lagos State, Nigeria

- Conduct daily site safety inspections and ensure compliance with HSE regulations.
- Identify workplace hazards, perform risk assessments, and implement corrective measures.
- Deliver safety briefings, toolbox talks, and induction training for site personnel.
- Monitor site activities to prevent accidents and ensure adherence to safety standards.
- Report incidents, near misses, and unsafe conditions; participate in investigations.
- Maintain HSE documentation, records, and compliance reports.
- Collaborate with engineers, supervisors, and workers to promote a strong safety culture.

## **Procurement & Technical Sales Specialist (Self-Employed)**

2019 – Present

- Manage procurement and sales of technology devices, properties, and related services nationwide.
  - Identify market demand, source products and services strategically, and close profitable sales transactions.
  - Apply strong negotiation and pricing strategies with suppliers and clients to achieve value-driven outcomes.
  - Oversee customer engagement, after-sales support, and long-term client relationships.
  - Handle inventory planning, service delivery coordination, and day-to-day business operations.
  - Maintain accurate sales, procurement, and financial records.
  - Provide basic technical guidance and support to clients where necessary.
-

## TECHNICAL SKILLS

- Construction Methods & Building Technology Principles
  - Health, Safety & Environment (HSE) Compliance and Risk Assessment
  - Hazard Identification & Site Safety Inspection
  - Solar Panel System Design and Basic Renewable Energy Application
  - Technical Documentation, Reporting, and Record Keeping
  - Research, Data Analysis, and Technical Problem Solving
  - Knowledge of Building Materials and Structural Principles
  - Site Monitoring and Safety Enforcement
  - Microsoft Word Proficiency for Technical Reporting
- 

## EDUCATION

- **Education** – B.Sc.Ed in Building Technology Education, University of Ilorin, 2024
- **Projects** – Solar panel project, final year research project.
